Dynamic Proactive Service

Precision, expertise, commitment and attention to detail position Plumb Engineering, P.C. to set extremely high expectations for each project.

High expectations . . . for Plumb Engineering.

High expectations . . . for its clients in the private and public sector.

Customer Focused

“We go beyond a client's expectations. We have built our reputation through our dedication to customer service. Our clients make the engineering field exciting for our team. We are proud of the fact that over 90% of our work is generated from satisfied repeat or referral clients.”

Karen L. Astorga, P.E.
President
Plumb Engineering, P.C.

Plumb Engineering, under the leadership of Founder and President Karen L. Astorga, P.E., covers the complete spectrum of interactive service. This full-service consulting firm specializes in Mechanical, Electrical, Plumbing, Fire Protection, Life Safety and Security building systems design. **The Plumb Engineering team serves clients by providing outstanding, personal, professional engineering services, building upon a foundation of teamwork, integrity, dedication and excellence.**

Under Ms. Astorga's direction, Plumb Engineering has assembled a vibrant team of experts who specialize in *exceeding expectations*. Trained and directed to approach project work differently than others, Plumb's professionals are adept at asking the right questions that determine *all* of a client's needs. The Plumb Engineering team looks at the answers to those needs from every angle. This team of professionals believes a customer is fully served when all of his or her needs are met.

This firm has quickly received the attention of many businesses, state and federal agencies. Plumb is simply *the first choice* of those looking for superior engineering services. The Plumb team delivers outstanding customer service dedicated to meet projects on time and on budget. Ms. Astorga heads the hand-selected team—highly credible, highly creative and highly energized. The Plumb team consists of licensed professional engineers, design engineers, and specialists in specification writing, project management, construction administration and computer aided design services. In addition, the Plumb team brings creativity to each project, ensuring consistently high quality design solutions.

Commitment

Precision

Technology to Benefit the Client

The Plumb Engineering team uses state-of-the-art technology to meet the demands of dynamic clients, while enforcing high security standards to ensure the confidentiality and integrity of clients' drawings and data. Plumb standards surpass National Institute of Building Science's National CAD Standard. Plumb is committed to meeting the highest industry standard to meet clients' present and future needs. A continuous investment in the latest technology and staff training benefits every client, every project, every step of the way.

The Plumb Engineering client base includes many private corporations and government agencies. New York State Contracting Agencies include Dormitory Authority of the State of New York, Office of General Services, State Insurance Fund, State University Construction Fund, and Department of Transportation. Through these agencies, work is performed for many New York State Client/Owner agencies, including Office of Mental Health, Department of Correctional Services, and Office of Mental Retardation and Developmental Disabilities.
