

**Cass Residential Center
Upgrade Electrical Service
Rensselaerville, New York**

Owner: NYS Division for Youth

Total Construction Cost: \$80,000.00

Electrical design and construction administration to provide electrical capacity and new panelboards with additional circuit breakers at a youth residential facility comprised of several buildings in a campus style arrangement. Services include providing new secondary feeder cables from the existing main electric service equipment to the administration and housing buildings. Remove the existing panels in the buildings and replace with new panelboards containing additional spare circuit breakers to accommodate present and future loads. Existing panelboard enclosures were utilized as spec boxes for extension of branch circuit wiring to new panelboards. Removal of existing secondary feeders presently serving the administration buildings. This project is part of an approved Consultant Term Contract Work Order with the New York State Office of General Services.
