

**Mt. McGregor Correctional Facility
Health Care Facility
Wilton, New York**

Owner: Department of Corrections

Total Construction Cost: \$4,700,000.00

Medical care for inmates in the medium security facility is provided in a new freestanding one story structure. The 28,000 s.f. building houses a primary care clinic unit for more urgent care at one end and an infirmary unit for longer term care at the other end. Primary care clinic handles emergency treatment, routine medical treatment, dental care, and X-ray. Four bed infirmary rooms and single bed isolation rooms compose the infirmary unit. The isolation rooms, with individual ante rooms, combine security needs with medical needs which are critical in the treatment of contagious diseases. Decorative concrete masonry with horizontal banding is used to blend the architecture with the existing facility campus within which it is located in rural upstate New York.

Special areas for plumbing and fire protection design included isolation rooms, exam rooms, dental care and infirmary. All areas are designed for handicap accessibility according to ADA requirements. Special areas are designed with special featured high security fixtures conforming with ADA.

Dental care area includes vacuum piping systems and compressed air system.

X-ray area includes fixtures for x-ray developing.

Plumbing & Fire Protection Cost: \$270,000
