

**The College of Saint Rose
Renovations and Addition to Existing Library
Albany, New York**

Owner: The College of Saint Rose

Total Construction Cost: \$3,000,000.00

Complete building renovations and addition involved 45,000 square feet library. Building Addition consisted of 20,000 square feet.

The renovations to the existing involved complete mechanical and electrical system rehabilitation. The main building system was designed to provide a central heating, air conditioning and humidification system serving both the existing and the new addition. The electrical lighting and power was renovated with new lighting design and provided central electrical distribution system to both the existing building and the addition.

Noise criteria were consistently considered and applied throughout design of the HVAC systems to provide a constant air distribution, code compliance and comfort in a quiet manner. Lighting was designed with various effects for task and general lighting. (Work performed by Karen L. Astorga, P.E. as a Design Engineer for Friedman Fisher Associates)
