

**Wallkill Correctinal Facility
Replace Primary Electric Service
Wallkill, New York**

Owner: NYS Department of Corrections

Professional services for investigation of existing primary high voltage electric service to provide alternate backup services from the utility company in order to improve the electrical system reliability. Electrical design consists of providing high voltage selector switches and new underground conduit manhole system including high voltage feeders to replace the existing deteriorated system. This project is part of an approved Consultant Term Contract Work Order with the New York State Office of General Services.
