## PHYSICAL SECURITY SYSTEMS AND STANDARDS

### Various NYS Office of Mental Health Facilities

Owner: New York State Office of Mental Health

Contact: Mr. Paul Coons, (518) 473-5818

Budget: \$53 Million (estimated)

Completed: 2012 (estimated)

NEW YORK STATE — Plumb Engineering, P.C. has entered into this important term agreement with the New York State Office of Mental Health (OMH) to implement Security Standards at OMH hospitals throughout the state. Currently, Plumb's responsibility as prime consultant extends to 29 hospitals as well as a separate cook chill plant. This is the latest extension of a contract we have held since 1995 and that has been awarded to us multiple times because of our commitment and work quality.

Under this contract, Plumb systematically reviews existing procedures and systems in each facility. The firm is then responsible for designing and implementing upgrades as well as overseeing planning, statewide maintenance contracts, and reviewing the overall quality of service from system vendors.

Plumb provides two functions. The first is to develop the security standards that each facility design must adhere to. This extends not only to physical designs and equipment, but also to the protocol that facility staff must follow.

The second function is to review the current security situation at each facility and then design upgrades to bring the facility into compliance with the agency standards. Plumb's scope extends from initial investigations and reports through construction documents, shop drawings, construction administration, and then staff training and system commissioning.
